EDUCATION

•Banasthali Vidyapith, Rajasthan

2024 – 2028

Bachelor of Technology in Electronics and Communication Engineering

CGPA (until 4th semester): 8.26

•DAV Public School, Kusunda

2022

Central Board of Secondary Education (CBSE) – Class XII

Percentage: 80.33%

•DAV Public School, Kusunda

2020

Central Board of Secondary Education (CBSE) – Class X

Percentage: 86.80%

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Java, Python, SQL

Core Domains: Backend Development, Software Engineering, Data Structures & Algorithms, Machine Learning

Frameworks & Libraries: FastAPI, Streamlit, Pandas, NumPy, Scikit-learn, OpenCV

Tools & Databases: Git, GitHub, MySQL, SQLite, VS Code, Postman

Core Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

Soft Skills: Problem Solving, System Design Thinking, Teamwork, Communication

SOFTWARE DEVELOPMENT PROJECTS

•AI-Powered Recruitment Backend Platform

Personal Project

End-to-end scalable application for intelligent data parsing, user ranking, and analytics.

- Developed a highly responsive backend architecture using Python, integrated with a robust SQLite database for data management.
- Designed and implemented modular data processing pipelines for automated resume parsing, feature engineering, and skill extraction.
- Built RESTful APIs and connected backend services to a dynamic Streamlit frontend dashboard for real-time recruiter analytics.

•ChatShield – Low-Latency Moderation API System

Hack Celestia / 2026

Real-time, scalable backend service for detecting and filtering toxic conversations across languages.

- Engineered a high-performance backend using FastAPI to serve multilingual NLP models (English, Hindi, Hinglish).
- Optimized API endpoints to achieve near-zero latency, enabling real-time content moderation and context-aware severity classification.
- Designed scalable architecture for seamless plug-and-play integration into existing chat-based web applications and platforms.

ACHIEVEMENTS

•Hack with Rajasthan – 3rd Position

2025

- Engineered the data pipeline and integration for an OSINT Intelligence Tool, achieving **95% processing accuracy** and reducing manual verification time by **70%** among **250+ participating teams**.

•GenIgnite at Microsoft – Top 15 Teams

2025

- Developed a real-time Safety Equipment Detection System emphasizing efficient model serving, achieving **92% accuracy** and sub-**200ms latency** for industrial monitoring.

•Hack Celestia – Project Finalist

2026

- Built **ChatShield**, architecting robust APIs for an AI-powered, real-time multilingual content moderation system.

•Problem Solving & Coding

2024 – Present

- Successfully solved **320+ problems** on LeetCode and completed corporate assessments on HackerRank, with a strong focus on Data Structures, Algorithms, and optimization.
