EDUCATION

•Banasthali Vidyapith, Rajasthan

2024 – 2028

Bachelor of Technology in Electronics and Communication Engineering

CGPA (until 4th semester): 8.26

•DAV Public School, Kusunda

2022

Central Board of Secondary Education (CBSE) – Class XII

Percentage: 80.33%

•DAV Public School, Kusunda

2020

Central Board of Secondary Education (CBSE) – Class X

Percentage: 86.80%

TECHNICAL SKILLS AND INTERESTS

Languages: Python, C++, Java, SQL

AI & ML Domains: Natural Language Processing (NLP), Computer Vision, Machine Learning, LLMs

Frameworks & Libraries: Hugging Face Transformers, FastAPI, Streamlit, OpenCV, Scikit-learn, Pandas, NumPy

Tools & Databases: Git, GitHub, VS Code, SQLite, MySQL, Jupyter Notebook

Core Coursework: Data Structures & Algorithms (DSA), Operating Systems, DBMS

Soft Skills: Problem Solving, Teamwork, Time Management, Communication

PERSONAL PROJECTS

•AI Resume Intelligence Platform

Personal Project

End-to-end AI recruitment platform for intelligent resume parsing, candidate ranking and recruiter analytics.

- Built an AI-powered recruitment platform using Python, Machine Learning, NLP, Streamlit and SQLite.
- Implemented resume parsing, skill extraction, candidate ranking, feature engineering and recruiter analytics dashboard.
- Designed a modular pipeline with automated resume processing, candidate recommendation and database integration for scalable workflows.

•ChatShield – AI-Powered Content Moderation System

Hack Celestia / 2026

Real-time multilingual AI moderation layer for detecting toxic and abusive conversations.

- Developed a multilingual NLP moderation system using Hugging Face Transformers and FastAPI for English, Hindi and Hinglish.
- Implemented context-aware toxicity detection with severity classification (Mild–Severe) enabling near-zero latency moderation.
- Designed scalable APIs for seamless integration into chat-based platforms.

ACHIEVEMENTS

•Hack with Rajasthan – 3rd Position

2025

- Built an Image-Based OSINT Intelligence Tool achieving **95% accuracy** and reducing manual verification time by **70%** out of **250+ participating teams**.

•Hack Celestia – Project Finalist

2026

- Developed **ChatShield**, an AI-powered real-time multilingual content moderation system with context-aware severity classification.

•GenIgnite at Microsoft – Top 15 Teams

2025

- Built a real-time AI Safety Equipment Detection System with **92% detection accuracy** and sub-**200ms latency** for industrial monitoring.

•Problem Solving & Coding

2024 – Present

- Successfully solved **320+ questions** on LeetCode, with a strong focus on Data Structures and Algorithms.
